

APPLIED MATHEMATICS AND MECHANICS

Vol.40 2019

INDEX

WU Feng and ZHONG Wanxie

A Note on *Symplectic Water Wave Dynamics* 1(1)

XUE Haifeng and NI Yong

Nonlinear Rheology of Glassy Materials: a Simplified Maxwell Model 1(8)

XU Chengjun, XU Shengli and LIU Qingyuan

Modified Particle Approximation to Pressure Gradients in the SPH Algorithm for Interfacial
Flows With High Density Ratios 1(20)

TANG Guangze, YAO Linquan, LI Cheng and JI Changjian

Longitudinal Vibration and Wave Propagation of Viscoelastic Nanorods Based on the Nonlocal
Theory 1(36)

BAO Siyuan and DENG Zichen

An Average Vector Field Method for Nonlinear Vibration Analysis 1(47)

YE Tiangui, JIN Guoyong and LIU Zhigang

A New Layerwise Theory for Vibration Analysis of Laminated Structures Based on Modified
Chebyshev Polynomials 1(58)

WANG Yufeng, JI Anzhao and CUI Jianbin

Numerical Solution of Schwarz-Christoffel Transformation From Rectangles to Arbitrary
Polygonal Domains 1(75)

FENG Yihu

Solitary Travelling Wave Solutions to Strongly Nonlinear Wave Equations 1(89)

MA Li and MA Ruinan

Almost Sure Asymptotic Stability of the Euler-Maruyama Method With Random Variable
Stepsizes for Stochastic Functional Differential Equations 1(97)

ZHAO Shilian

Strong Convergence of CQ Algorithms for Split Feasibility Problems in the Hilbert Spaces 1(108)

YANG Zhao, LAN Jun and WU Yongjun

On Solutions to Several Classes of Differential-Algebraic Equations Based on Artificial Neural
Networks 2(115)

CHENG Xianjun, WANG Yihong and WANG Rubin

Neurodynamic Analysis of Mutual Antagonism Between Default Mode Networks and
Task-Positive Networks 2(127)

RONG Weifeng and WANG Rubin

Neurodynamic Analysis of Cochlear Hair Cell Activity 2(139)

HU Lijun, YUAN Li and ZHAI Jian

A Robust and Low-Dissipation Flux Splitting Scheme 2(150)

ZHOU Jun and HUANG Wei

Improved Conditions for Block-Sparse Signal Recovery via the Non-Convex Optimization Model 2(167)

CHEN Lijuan and LU Shiping

Periodicity of the Model for Electron Beam Focusing Systems 2(181)

XING Shuaibing, WANG Qiangsheng, SHENG Yue and JIANG Xiaoyu

Effects of Circular Inhomogeneity on Crack Propagation 2(189)

GUO Zhao, GUO Zitao and YI Lingyan

Analysis of Multicrack Problems With Eigen COD Boundary Integral Equations 2(200)

GAO Yuanyuan and LIU Guanting

Analytical Solutions to Problems of Elliptical Holes With 4 Edge Cracks in 1D Orthorhombic Quasicrystals 2(210)

ZHANO Xuefen and LI Xing

A Frictionless Contact Problem of 2D Decagonal Quasicrystal Plane Elasticity With Cracks 2(223)

ZHANG Yingchun, LI Ying, XIAO Manyu and XIE Gongnan

Some Preconditioning Iterative Algorithms for Non-Hermitian Linear Equations 3(237)

ZHANG Jun, LI Lizhou and YUAN Meini

Optimization of RBF Parameterized Airfoils With the Aerodynamic ROM 3(250)

LI Yudong, WANG Fajie and CHEN Wen

MATLAB Implementation of a Singular Boundary Method for Transient Heat Conduction 3(259)

WANG Manling, WANG Aitao, LI Yang, PENG Junqiang and LI Shuchen

Numerical Simulation of the Whole Instability and Destruction Process for Fully Weathered Slopes Based on the FEMLIP 3(269)

SUN Ying, ZHANG Wei and WU Ruiqin

Analysis on Nonlinear Dynamics of Circular Truss Antennae in 6D Systems 3(282)

ZHAO Chen and GE Xinsheng

A Control Method for Underactuated Cranes Based on Virtual Holonomic Constraints 3(302)

ZHOU Piaopiao and ZHU Guanghu

Dynamic Analysis of the Avian Influenza A (H7N9) Transmission Model 3(311)

LIU Wenqing and CHEN Qingwan

Influence of Diffusion on an Invasion-Diffusion Prey-Predator Model With Disease Infection in Both Populations 3(321)

CAO Jianzhi, TAN Jun and WANG Peiguang

Hopf Bifurcation Analysis of a Model for Spruce Budworm Populations With Delays 3(332)

WANG Haiying and FU Zufeng

D - η - E -Semi-Preinvex Mapping and D - η - E -Properly Semi-Prequasi-Invex Mapping 3(343)

DU Xin, LU Zhiwei, LI Dongmei, XU Yandong, LI Peichao and LU Detang

Pressure Transient Analysis of the Fractured Vuggy Reservoir Model Coupling Oil Flow and Wave Propagation 4(355)

ZHOU Bo, WANG Hongqian, WANG Hui and XUE Shifeng

A Mechanical Constitutive Model for Hydrate-Bearing Sediments and Calculation of Material
Parameters With the Discrete Element Method 4(375)

XU Chaoyang, MENG Yingfeng, GUO Jinsong, LI Gao and QIU Quanfeng

Research on the Implicit AUSMV Algorithm for the 1D Gas-Liquid Two-Phase Drift Flux Model 4(386)

NING Lizhong, WU Hao, NING Bibo, TIAN Weili and NING Jinghao

Convection Patterns and Corresponding Critical Conditions in an Inclined Layer 4(398)

XU Lina and JIAN Yongjun

Electrokinetic Flow and Heat Transfer in Soft Microtubes 4(408)

ZHANG Fuying, LI Tiantian and ZHANG Yufei

Analysis on Free Deformation Characteristics of Packer Rubber Surface Under the Initial Sealing
Load 4(419)

NARANMANDULA, HAN Yuanchun and ZHANG Fang

Solitary Wave Evolution and Non-Smooth Solitary Waves in Microstructured Solids 4(433)

XIAO Yanping, SONG Haiyang and YE Xianhui

Parameter Uncertainty in Statistical Energy Analysis 4(443)

SHAO Chongyang, PENG Zaiyun, WANG Jingjing and ZHOU Daqiong

Characterizations of H-Continuity for Solution Mapping to Parametric Generalized Weak Vector
Quasi-Equilibrium Problems 4(452)

REN Limei

The First Passage Failure Probabilities of Dynamical Systems Based on the Failure Domain
Reconstruction and Important Sampling Method 4(463)

YU Bo, WU Yue, NIE Chuanbao and GAO Qiang

A Non-Iterative Method for Dynamic Load Identification 5(473)

FENG Yan, DU Guojun, SHEN Zhenxing and WANG Mixiao

Equivalent Stiffness of Sinusoidal Periodic Dimpled Plates 5(490)

JIANG Pengfei, YAN Yan and WANG Wenquan

Dynamical Behavior Analysis of Micro Beams Conveying Fluid in Longitudinal Magnetic Fields 5(498)

WANG Xue and ZHAO Weidong

Geometrically Nonlinear Analysis of Functionally Graded Beams Under Thermomechanical
Loading 5(508)

ZHAO Zhiqin and QING Guanghui

Improved Noncompatible Generalized Mixed Elements and Performance Analysis 5(518)

XU Hongfa, MA Yuqing, YANG Yaoran, LÜ Yaru and GEN Hansheng

Creep Lifetime Evaluation of Muddy Salt Rock 5(527)

BAO Liping, LI Wenyan and WU Liquan

Singularly Perturbed Solutions of Non-Fourier Temperature Field Distribution in Single-Layer
Materials 5(536)

QIAO Dianliang, LI Xiaoyang, GUO Mingmin and ZHANG Peng

A Conserved High-Order Traffic Flow Model With Discontinuous Flux and Its Numerical
Simulation 5(546)

JI Anzhao

Transient Pressure Analysis of Bi-Zone Composite Horizontal Wells With Non-Newtonian and
Newtonian Power-Law Fluid Flow 5(562)

ZHANG Jinglong, WANG Zunce, XU Yan and XU Dekui

Research on Pressure Strain Correlation Terms in the Reynolds Stress Model for Spiral Flow in
Reducing Pipes With Rotating Wall 5(574)

WANG Yongfu, QI Wenkai and SHEN Cheng

Free Vibration Analysis of Rectangular Honeycomb-Cored Plates Under Elastically Constrained
Boundary Conditions 6(583)

LIU Xiaomei, ZHOU Gang and ZHU Shuai

A Highly Precise Symplectic Direct Integration Method Based on Phase Errors for Hamiltonian
Systems 6(595)

ZHAO Qingyou, ZHANG Yuanhai and SHAO Jiangyan

Analysis of Shear Lag Effects in Box Girders With Variable-Thickness Flanges 6(609)

ZHANG Daguang

High-Order Analytical Solutions and Convergence Discussions of the 2-Step Perturbation Method
for Euler-Bernoulli Beams 6(620)

SUN Guomin, ZHANG Xiaozhong and SUN Yanhua

Multi-Scale Structure Optimization Design Based on Eigenvalue Analysis 6(630)

LIU Zhangjun, HE Chenggao and ZHANG Chuanyong

An Improved Algorithm for Solving Dynamic Responses of Vehicle-Track Vertically Coupled
Systems 6(641)

LU Wei, ZHAO Dong, LI Dongbo and MAO Xiaofei

A Composite Optimization Method for Anchorage Parameters of Rammed Earth Sites Based on
Desirability Functions 6(650)

DAI Meng and YIN Xiaoyan

Unconditionally Optimal Error Estimates of the Semi-Implicit BDF2-FEM for Cubic Schrödinger
Equations 6(663)

GUO Nanxin and ZHANG Shougui

A Self-Adaptive Uzawa Block Relaxation Algorithm for Free Boundary Problems 6(682)

ZHAO Dan and SUN Xiangkai

Some Robust Approximate Optimality Conditions for Nonconvex Multi-Objective Optimization
Problems 6(694)

WANG Xinwei, PENG Haijun and ZHONG Wanxie

Optimal Vaccination Strategies for a Time-Varying SEIR Epidemic Model With Latent Delay 7(701)

ZHANG Qiu and CHEN Guangsheng

Existence of Critical Traveling Waves for Nonlocal Dispersal SIR Models With Delay and
Nonlinear Incidence 7(713)

WANG Xiaoe, LIN Xiaolin and LI Jianquan

Dynamic Analysis of a Class of HIV-1 Infection Models With Pulsed Immunotherapy 7(728)

WANG Jiang and **CHEN Wen**

- A Combined Artificial Neural Network Method for Solving Time Fractional Diffusion Equations 7(741)
- WANG Siqiang** and **JI Shunying**
- A Parallel Algorithm for Super-Quadric Discrete Elements Based on the CUDA-GPU Architecture 7(751)
- LI Bowen**, **DING Jieyu** and **LI Yanan**
- An L-Stable Method for Differential-Algebraic Equations of Multibody System Dynamics 7(768)
- ZHANG Yan**, **LI Fanru**, **LI Wei** and **LIU Zuojun**
- Dynamic Analysis and Simulation of the Lower Extremity Exoskeleton Based on Human-Machine Interaction 7(780)
- HU Jiahui**, **WANG Jungang** and **NIE Yufeng**
- Two High-Order Difference Schemes for Solving Time Distributed-Order Diffusion Equations 7(791)
- LU Zeyang**, **LI Shujiang** and **WANG Xiangdong**
- Adaptive RBF-Network Dynamic Surface Tracking Control of Sprayer Boom Systems 7(801)
- ZHOU Jingrun** and **FU Jingli**
- Lie Symmetry of Constrained Hamiltonian Systems and Its Application in Field Theory 7(810)
- WU Feng** and **ZHONG Wanxie**
- Internal Mechanical Shock Wave; an Explanation of the Ocean Shock Current 8(823)
- BAI Yuchuan**, **WEN Zhichao**, **XU Haijue**, **LIAO Shizhi**, **CAO Yonggang** and **XIA Huayong**
- Problems and Improved Methods of 3D Ocean Hydrodynamic Calculation With the σ Coordinate Transformation 8(840)
- DAI Dexuan** and **WANG Shaowei**
- Linear Stability Analysis on Thermo-Bioconvection of Gyrotactic Microorganisms in a Horizontal Porous Layer Saturated by a Power-Law Fluid 8(856)
- GUO Shihao** and **LI Ye**
- An Experimental Study of Leakage Effects on Flexible Pipelines 8(866)
- YANG Ming**, **LIU Jubao**, **YUE Qianbei**, **DING Yuqi** and **YAO Liming**
- Numerical Simulation of Fluid-Solid Coupling Collision Based on the Finite Element Immersed Boundary Method 8(880)
- LIANG Bin**, **SHI Xiaohai**, **YU Cunxiang**, **LI Huimin** and **LI Juncheng**
- Analysis of Effects on Shock Initiation Performances for Booster Charge Structure Parameters 8(893)
- MENG Dejie** and **DENG Dawen**
- Global Smooth Solutions With Exponential Growth to 2D Inviscid Boussinesq Equations Without Heat Conduction and 3D Axisymmetric Incompressible Euler Equations on Smooth Domains 8(910)
- GAO Jinge** and **LI Jingxiao**
- Study on Lightning Induced Voltages in Transmission Lines Under Soil Conductivity Stratified Structures 8(917)
- LI Cong**, **NIU Zhongrong**, **HU Zongjun**, **HU Bin** and **CHENG Changzheng**
- Computation of Total Stress Fields for Cracked Bi-Material Structures With the Extended Boundary Element Method 8(926)
- CHEN Shenshen** and **ZENG Jiawei**
- A Reproducing Kernel Interpolation Method for Axisymmetric Elastodynamic Problems 8(938)

XING Qinyan, YANG Qinghao, LU Chenyu and YANG Xing	
An EEP Adaptive Strategy of the Galerkin FEM for Axially Forced Vibration of Bars	9(945)
LI Jiayu, ZENG Zhong and QIAO Long	
Numerical Simulation of Droplets' Dynamic Wetting Process With the Phase Field Method	9(957)
DONG Yanchen, ZHANG Yewei and CHEN Liquan	
Dynamic Analysis of the Nonlinear Vibration Absorber-Energy Harvester Integration Model With Inerters	9(968)
ZHENG Gang, LI Zhangyu, GUO Zengwei and ZHANG Xiaodong	
Properties of the Eigen Solution of Taut Strings With Concentrated Damping	9(980)
ZHONG Hao and XIANG Tianyu	
A Transfer Matrix Algorithm for Vertical Free Vibration of Suspension Bridges	9(991)
DU Chunyao, YANG Liangui, ZHANG Yongli and ZHANG Ruigang	
Nonlinear Near Inertial Waves With Complete Coriolis Effects	9(1000)
YIN Yueming, LI Zongli, LI Dongqi and LÜ Congcong	
Study on Effects of Interfacial Arc Cracks on Cracking Strengths of Concrete	9(1011)
WANG Yuning and ZHAO Baosheng	
General Solutions of Elastodynamics for 2D Isotropic Porous Media	9(1025)
HE Zizhou and ZHOU Fengxi	
Analytical Solution for 1D Consolidation of Unsaturated Soil Under Constant Load and Double-Side Drainage	9(1035)
SHENG Junjie, LI Jia, ZHANG Yuqing, LI Shuyong and LIAO Bin	
Analysis of Water Contents in Uranium Packaging Containers	9(1048)
YANG Feng and GUO Ran	
Study on Contact Algorithms for the Polygonal Hybrid Stress Element Method	10(1059)
BAI Qiaomei and DING Shenghu	
An Anti-Plane Problem of Cracks at Edges of Regular Hexagonal Holes in 1D Hexagonal Piezoelectric Quasicrystals	10(1071)
TIAN Yaozong and JIAN Kailin	
Lateral Vibration Analysis of Axially Moving Beams	10(1081)
CUI Jianbin, JI Anzhao and XIONG Guiming	
Research on Surrounding Rock Stress Distributions for Circular Tunnels Based on the Schwarz-Christoffel Transformation	10(1089)
WANG Jinbao, TONG Zhuoyu, HE Bo and XU Guangying	
A Semi-Analytical 1D Consolidation Solution of Saturated Soft Clay With Changing Stresses Along the Depth	10(1099)
SHAO Jiangyan, ZHANG Yuanhai, ZHAO Qingyou and YAO Xiaodong	
Stress Analysis on Distortion of Corrugated Steel Web Box Girders	10(1109)
PENG Rongrong	
Analysis of Resonance and Bifurcation Characteristics of Some Duffing Systems With Quintic Nonlinear Restoring Forces	10(1122)

ZHOU Xiaomin and SUN Zheng

Simulation of Non-Newtonian Fluid Flows With the Material Point Method 10(1135)

YU Mengnan

Well-Test Analysis of Hydraulic Fractured Wells in Fracture-Vug Low-Permeability Carbonate Reservoirs 10(1147)

ZOU Sen, LIU Yong and WANG Qi

Numerical Study on Passive Control of Airfoil-Vortex Interaction Based on Slotted Leading Edges 10(1159)

WANG Kuaini, CAO Jinde and LIU Qingshan

An Exponential Laplace Loss Function Based Robust ELM for Regression Estimation 11(1169)

ZHU Wanchuang, JI Chunlin and DENG Ke

Recent Progress of Approximate Bayesian Computation and Its Applications 11(1179)

MUHAMMADHAJI Ahmadjan and LI Hongli

General Decay Synchronization for Recurrent Neural Networks With Distributed Time Delays 11(1204)

WANG Lan, XIE Da, DONG Yiping and CAO Jinde

Adaptive Control of Nonlinear Systems Based on Quasi-ARX Multilayer Learning Network Models 11(1214)

YOU Xingxing and LIANG Lunhai

Global Mittag-Leffler Stability of Discrete-Time Fractional-Order Neural Networks 11(1224)

XIE Chunli, LIN Xujiang, LIU Xiaoyang, ZHANG Wenbin and HUANG Junwei

A Source Code Similarity Approach Based on Improved Convolutional Neural Networks 11(1235)

LIU Libin and PAN Heping

State Estimation of Complex-Valued Neural Networks With Leakage Delay and Mixed Additive Time-Varying Delays 11(1246)

HAN Fengqing, XIAO Dan and GUAN Lihe

A New Method for 3D TOA-Geolocation in Non-Line-of-Sight Environment 11(1259)

HU Dengzhou and HE XingSparse Reconstruction of Fixed-Time Gradient Flow in the ℓ_1 - ℓ_2 Norm 11(1270)**LIU Chen and LIU Lei**

Optimal Leader-Follower Consensus of Multi-Agent Systems Based on the Event-Triggered Strategy 11(1278)

LIU Song, PENG Yong, SHAO Yiming and SONG Qiankun

Expressway Travel Time Prediction Based on Gated Recurrent Unit Neural Networks 11(1289)

LI Tianze, GUO Ming, CHEN Xiangyong, ZHANG Han and MA Jianyu

Finite-Time Combination Synchronization Control of Complex-Variable Chaotic Systems With Multi-Switching Transmission 11(1299)

BAO Siyuan and SHEN Feng

An Improved Precise Integration Method for Fractional Ordinary Differential Equations 12(1309)

ZHOU Bo, ZHENG Xueyao, KANG Zetian and XUE Shifeng

A Timoshenko Micro-Beam Model and Its Size Effects Based on the Modified Couple Stress Theory 12(1321)

SHI Jun, XU Lueqin and LU Xiaoluo	
A Simplified Analysis Method for Seismic Responses of Floating-System Cable-stayed Bridges With Viscous Dampers	12(1335)
ZHANG Xue and SUN Yuhuai	
Dynamical Analysis and Solutions for (3+1)-Dimensional Time Fractional KdV-Zakharov-Kuznetsov Equations	12(1345)
ZHU Hongbao	
A Class of Fractional Nonlinear Singularly Perturbed Problems With Time Delays	12(1356)
YANG Ming, LI Linting and GAO Ying	
Relations Between Robust Efficient Solutions and Properly Efficient Solutions to Multiobjective Optimization Problems	12(1364)
ZHAO Yingying and HU Hua	
Dynamic Behaviors of Stochastically Delayed SIRS Epidemic Models With Standard Incidence Rates Under Information Intervention	12(1373)
ZHOU Jun, TONG Dongbing and CHEN Qiaoyu	
Synchronization of Master-Slave Systems With Multiple Time-Varying Delays Based on the Event-Triggered Mechanism	12(1389)
JIANG Wei, HAN Huili and LI Fengjun	
Numerical Solution to the Second Kind of Fredholm Integral Equation Based on the Adaptive Wavelet Neural Network	12(1399)
AZI Aying, RAO Ruofeng, ZHAO Feng, HUANG Hongyan, WANG Xue and LIU Hao	
Impulse Control of Financial Systems With Probabilistic Delay Feedback	12(1409)
